

# WORKSHOP ON CHARACTER RIGGING

The students of 18UAN, KAUSHAL Kendra, Loyola College attended an invigorating workshop on Character Rigging by Mr. Raghunath Krishna on 5<sup>th</sup> and 6<sup>th</sup> December 2019. The workshop helped students to understand bone structures and the movement of joints and muscles which enables them become an ace animator.

Students also learnt the importance of rigging and the clear need of bones in the right places and joints so that it doesn't create chaos in the subsequent process of animation, production and post production process. In addition, students were showcased with various types of joints and the bones present in our body. Understanding the anatomy of a human body, comparing it with the other animals was a helpful method, especially for rigging of different models.

Learning various short keys, gimbal lock, set driven key, the importance of naming the attributes created, the exact process of rigging in the current industry were also useful. The students were enlightened with the latest developments in the industry also.
